PROJECTS

Web Developer | React | Rest API | JavaScript | HTML | CSS | Node.js

- Developed a fully functional recipe app using **React** with **Vite** for fast development and optimized build performance.
- Integrated a recipe API to fetch and display dynamic content, providing users with a searchable database of recipes.
- Implemented features such as filtering, searching, and recipe details with an intuitive and responsive user interface.

Web Developer | NASA API Integration | JavaScript | HTML | CSS | Node.js

- Built a space-themed web app using **React** and **Vite** to display real-time data from NASA's public APIs.

WORK EXPERIENCE

Mobile Developer | React Native | Web API | JavaScript | HTML | CSS | Node.js

NextStage – Jordan
April 2020 - 2022

- Designed and implemented dynamic and responsive user interfaces using a combination of HTML, CSS, and JavaScript frameworks.
- Utilized React Native to build interactive and high-performance mobile applications. Integrated various Web APIs to enhance application functionality and interactivity. Worked with Node.js to handle server-side logic ensuring smooth data flow between client and server.

Salesforce Developer | Apex | Data Loader | SQL | Visualforce | Lightning

Northteq - Minnesota
November 2022 – 2023

- Participated in comprehensive Salesforce CRM training, focusing on Sales Administration and Platform Development.
- Developed and implemented Salesforce solutions to meet business needs.
- Provided ongoing support and enhancements for existing applications.

Firmware Program | Test Flow | Noah

Resound GN - Bloomington
June 2023 – Present

- Managed hearing aid data and tracked serial numbers for quality control.
